Professional Experience

Software Engineer — Smarkk, Riyadh, Saudi Arabia

March 2024 – Present | Remote

Started part-time while working at Nadeera Technologies LTD (both belongs to the same owner), then transitioned to full-time in January 2025

- Built and published multiple production apps using React Native and Ionic React
- Added automated testing using Vitest for unit tests and Cypress for end-to-end testing

- Developed company internal tools and dashboards using React
- Implemented reusable UI components, optimized performance, and improved app reliability
- Collaborated on a Langflow-based Multi-Agent AI system, integrating front-end logic with back-end LLM workflows

Software Engineer — Nadeera Technologies LTD, Dubai, UAE

January 2023 – January 2025 | Remote

Testing, maintaining and enhancing company-provided applications with some apps reaching 10k+ downloads e.g: “YallaReturn” and “ReList”

- Adding features, ensure proper functionality and addressing issues as they arise
- Utilizing testing frameworks, jest and Detox, to ensure code quality

Projects

NadineHome: <https://nadinehome.org/>

October 2024 - Present

Ecommerce platform available on Appstore and Google Play reaching 200+ users on the first launch. I used React Native for the Mobile App. Laravel and PostgreSQL for the backend and database. NextJS for the website . I used React for the Dashboard and Financial system.
